ART UNIT

PAPER NUMBER

3687

MAIL DATE

DELIVERY MODE

07/21/2009

PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/668,395	Applicant(s) KIRKLEY, ADAM J.	
	Examiner Ig T. An	Art Unit 3687	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 May 2009.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-15 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-15 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 23 September 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

The Amendment filed on 14 May 2009 has been acknowledged. Claims 1, 11 - 14 are amended. Claim 15 is newly presented. Currently, claims 1 – 15 are pending and considered as set forth.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. **Claims 1 - 2, and 4 - 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Swartz (US 5877485) in view of Walter et al. (Hereinafter Walter) (US 5992570).**

As per Claim 1, Swartz discloses a security method for a self-service checkout system (Abstract) comprising the steps of:

a) obtaining identification information of a customer involved in a self-service transaction by a self-service computer of a customer operated self-service checkout system (Column 4 line 27 – 42 teaches the system receive customer information in a transaction from a customer loyalty card);

b) determining a risk level associated with the identification information of the customer (Abstract teaches the self-scanning checkout system determines the risk level/ number of items to check based on the identification information of the customer such as shopping frequency, queue length, prior history, and etc.);

c) determining a security level associated with the risk level (Abstract and Column 6 lines 45 – column 7 line 34 teaches the self-scanning checkout system calculates how many items to be check is determined based on security criteria and customer identification information such as shopping frequency, prior history and etc.); and

d) configuring the self-service checkout system to complete the self-service transaction by the self-service computer including the self-service computer to identify products, in accordance with the security level by the self-service computer (Abstract teaches the self checkout system that determines how many items to check by cashier or security guard based on the security level).

However, Swartz is silent regarding the self-checkout system accepting payment from the customer at the self-service computer.

Walter discloses self-service checkout apparatus having the self-checkout system accepting payment from the customer at the self-service computer (Abstract teaches self-service checkout apparatus accepting card and cash payment).

Therefore, from this teaching of Walter, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify self-checkout system which determines the risk and security level of customer using statistic data of Swartz to include the self-checkout system accepting payment as taught by Walter to provide the checkout station which has combined functionality of ATM and POS terminals (Column 2 line 11 - 14)..

Furthermore, all the claimed elements were known in the prior arts of Swartz and Walter, and one skilled in the art could have combined the elements as claimed by known methods with no change in their respective functions, and the combination would have yielded predictable results to one of ordinary skill in the art at the time of the invention.

As per Claim 2, Swartz discloses obtaining the identification information from a loyalty card carried by the customer (Column 4 line 27 – 42).

As per Claim 4, Swartz discloses

b-1) storing shopping history data of the customer (Abstract); and

b-2) assigning a risk level based upon the shopping history data of the customer (Abstract).

As per Claim 5, Swartz discloses

b-1) storing shopping history data of the customer (Column 7 lines 3 – 8);

b-2) obtaining current transaction data of the customer (Column 6 lines 45 – 54);

and

b-2) assigning a risk level based upon the shopping history data of the customer and the current transaction data of the customer (Column 7 line 35 – 55).

As per Claim 6, Swartz discloses

b-1) defining categories of shoppers of different risk levels (Abstract);

b-2) storing shopping history data of the customer (Abstract);

b-3) determining a category of the customer by comparing the shopping history data of the customer to the categories of shoppers (Column 7 line 35 – 55); and

b-4) determining that the risk level is associated with the category of the customer (Column 7 line 35 – column 8 line 15).

As per Claim 7, Swartz discloses

c-1) looking up the risk level of the customer in an established list of risk levels (Column 7 line 35 – column 8 line 15); and

c-2) determining that the security level of the customer is associated with the risk level of the customer in the list (Column 8 line 16 – 49).

As per Claim 8, Swartz discloses relaxing security for lower security levels (Abstract and column 7 line 35 – column 8 line 24. Fewer items will be checked for a customer who is high security level and low risk level).

As per Claim 9, Swartz discloses tightening security for higher security levels (Abstract and column 7 line 35 – column 8 line 24. More items will be checked for a customer with higher risk level and lower security level).

As per Claim 10, Swartz discloses

e) implementing configured security procedures for the security level until the customer leaves the self-service checkout system (Column 8 line 16 – 49); and

f) storing data from the transaction in shopper history data of the customer (Column 8 line 36 – 49).

Claims 11 – 15 have similar limitations as Claims 1 – 2 and 4 - 10.

Therefore, Claims 11 – 15 are rejected under same rationale.

1. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Swartz in view of Walter and in further view of Zhang et al. (hereinafter Zhang) (US 20030177066).

As per Claim 3, the combination of Swartz and Walter discloses all the elements of the claimed invention, but is silent regarding obtaining biometric data from the customer; and determining that the identification information of the customer is associated with the biometric data of the customer.

Zhang discloses an integrated marketing promotion system and method having obtaining biometric data from the customer (Paragraph 127); and determining that the identification information of the customer is associated with the biometric data of the customer (Paragraph 127).

Therefore, from this teaching of Zhang, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify self-scanning checkout system of the combination of Swartz and Walter to include biometric data of customer as a identification information as taught by Zhang to easily identify and verify the customer.

Furthermore, all the claimed elements were known in the prior arts of Swartz, Walter and Zhang, and one skilled in the art could have combined the elements as claimed by known methods with no change in their respective functions, and the combination would have yielded predictable results to one of ordinary skill in the art at the time of the invention.

Response to Arguments

2. Applicant's arguments filed 14 May 2009 have been fully considered but they are not persuasive.

The Applicant argues “ Swartz fails to teach the element d) “configuring the self-service checkout system to complete the self-service transaction by the self-service computer, including configuring the self-service computer to identify products scanned by the customer at the self-service computer, configuring the self-service computer to perform weight checks of products placed on the scale by the customer at the self-service computer, and to accept payment from the customer at the self-service computer, in accordance with the security level.” of the claims 1, 11 and 14.” In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3687

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ig T. An whose telephone number is (571)270-5110. The examiner can normally be reached on Monday - Thursday from 9:30 AM to 5 PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matthew S. Gart can be reached on 571-272-3955. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
